## Grain Markets

WINNIPEG, July 6.—After showing an easier tendency during the majority of the session, the market wheat turned strong during the last thirty minutes and recorded substantial gains. Trading generally was moderately quiet, but there was some trade reported in export wheat. The close ranged from 1 to 1 1/2 higher with December leading the advance. Considerable buying was reported for the month and was believed to be short covering, as

**Tenants**—Wholesale trade fair. Retail trade about the same with prospects quiet in fair. Collections about the same.

**Wholesaling**—Wholesale trade practically unchanged. Retail trade satisfactory.

**Hosiery**—Wholesale trade fair. Retail trade about the same with prospects quiet in fair. Collections about the same.

**Shoes**—Wholesale trade fair. Retail trade improving. Collections about the same.

**Garage**—Wholesale trade about the same. Retail trade improving. Collections about the same.

**Books**—Wholesale trade fair. Retail trade about the same with prospects and packers reporting slight improvement. Collections only fair.

**Records Show Driest Year Since 1880**

**Driest Five-Year Period in Eighty-Five Years Was 1883 to 1887**

**When in Four Months Only 7.37 Inches of Rain Fell**

When so much depends upon the rainfall during the summer months, it may be interesting to learn that the precipitation records of the past year show that the driest five-year period in the history of the country was the period from 1883 to 1887. During that time the total rainfall in the five years was only 37.37 inches, or an average of 7.37 inches per year. The driest year of the period was 1885, when only 4.14 inches of rain fell. The next driest year was 1886, when only 4.23 inches of rain fell. The driest year of the century was 1887, when only 4.33 inches of rain fell. The driest year of the century was 1887, when only 4.33 inches of rain fell.

ment, where the records go back to 1912. The average rainfall distribution for these four months is 5.5 inches. From 1927 to 1931 only 4.3 inches of rain came. Wet periods came in both years from 1928 to 1932 when at Medicine Hat 11.25 inches fell, and at Swift Current, 13.6 inches. These records, taken on the wheat belt, show unmistakably that the last few months have been unusually dry. The first year period and the following months have been relatively arid, but the second year has been of general conditions. Moreover, at a few places here have been registered fairly considerable areas of the rainfall have been over. The winter does not wish to convey the impression that crop yields were directly with the amount of the rainfall because they are not, on the other hand, if it is common knowledge that winter very dry and our yields are poor. If the snow of the year means anything, that they certainly do, then according to the weather bureau, the winter has been about as compared to the average last year.

**SPLENDID CORPUSCULES IN NORTH EASTERN PART OF PROVINCE**

Reports from the north eastern part of the province, both north and south of the Manitoba river show that crops were sown fairly early and are uniform. Hay crop is so good and the grain will be ready to harvest by July 15th. The usual time of harvesting begins in July and wheat harvest will be general by August 15th, unless we are confronted with the situation of the weather. The outlook is very favorable. The outlook for the coming year is very good. The outlook for the coming year is very good. The outlook for the coming year is very good.

enough to keep the weeds down. Owing to the moist condition of the soil, more breaking is being done than usual. There was very little land broken last year on account of the dry weather.

Notwithstanding the abundance of the growing and lands are still dry. The ground has absorbed all the moisture that has yet fallen.

**TIPS MARKED**

John Anderson shipped a wagon load of stock to Edmonton last week. Included in this lot was a cow as young as Frank Schultz, a grade Hereford which he purchased last fall in the York Harbour lot. As this animal topped the market on Wednesday of last week, he is in the third year in the last few years. The Hereford has had cattle that topped the Edmonton market—Allison Thomas.

It is estimated that the abundance of the present Venus condition of the grass is the equivalent of the amount of oxygen present in the atmosphere of our planet.

# The Improved Binder of Today

## Soon Pays for Itself by What It Saves

Every year the old binder falls off a bit more inefficiency. The owner hardly realizes the gradual decline. Finally comes a time when the risk is too great. For cutting, faying binding, drag-elevators, heavy draft, delays, emergency repairs, hot bushes and loss of temper—these are incidents of the harvest with a worn-out binder.

In the meantime the new McCormick or Deering binder goes into neighboring fields and surprises and pleases its owners in a hundred different details. If you haven't seen the perfected binder of 1923

you can't realize what a vastly improved harvester it is. You will find it a marvel of skill and good workmanship, simpler, better made, easier to handle, and ready for many years of good service.

Harvest is the critical time when all your plans and labor come to a head; go at it with trustworthily equipment. Will your binder stand the test this season? If any doubt is in your mind, invest in the crop-saving machine sold by your McCormick-Deering agent. Look the binder over in detail at his store.

### INTERNATIONAL HARVESTER COMPANY

of Canada, Ltd.

#### Mccormick Deering Binders

Mccormick Deering Binders are built in two sizes: 12-foot or 14-foot cut. Big foot elevator is regular equipment. An 80-foot elevator furnished at extra cost. Ask the Mccormick Deering agent about these binders.

#### Binder Twine

Specially adapted for the use of newly high grade twine—McCormick Deering International-made twine in the famous "Big Ball" winding in which the ball do the work of 10 of the old ones. Beware of the old low ball twine! Beware of the low average delivery per hour. Arrange for delivery by long distance rail.
